 A priceless legacy for future generations

Memories

Memories are the one thing we leave behind that will continue to go on living. We at **Memory Vision** are committed to helping you preserve your memories – both past and present – so they will continue to have an impact on future generations.

Everyone has a story to tell – and **Memory Vision** wants to help families have access to these stories by unlocking them and recording them for future generations. We do this by producing well designed DVD's and hard-bound books.

We can create a person's complete biography, or focus on highlights of a person's life – such as “a soldier's story,” or “my journey of faith,” or “our love story,” or ... you fill in the blank. We can even help capture the life of a deceased person through interviewing those who knew the person.

Authors often say that the most important part of recording a story is just getting started. Isn't it time for you to take that first step that will ensure a lasting legacy for generations to come? Please contact us – today – and we will help you get started recording the story you know best – the story that others need to hear – the story of your life.

“If history were taught in the form of stories, it would never be forgotten.”

– Rudyard Kipling
